

Super Intensive Olive Grove for sale in Seville, Spain

The variety of the olive is **Arbequina** and is the unique variety on this olive grove.

500 hectares Farm.

It was **planted** in June 2006 & April 2007, **around 620.000 olive trees**.

There are **4 wells** of 15 - 20 litters per second each one and **two big ponds** with an area of about one cubic hectometre between them.

The arroyos (creek / draw, not sure the translation) supply the two pounds with no engines and no cost of electricity.

A big heart pumping has capable of irrigating the entire farm in 8 hours.

There are several edifications in the farm described on the [following link](#)

Several **options** can be planned **for the sale of the future olives**:

- Olives can be sold per kilos to several mills located on the area.
- The sale of your own olive oil paying to the mills a percentage for the milling.
- The construction of your own mill in the state as there is enough space for it.

The **harvest cost** for this type of Super Intensive Olive Grove goes from 3 to 6 cents of Euro per kilogram of olives.

The stipulate yearly harvest for this type of Super Intensive Olive Grove is 15.000 Kg per hectare.

Our Super Intensive Olive Grove has a **stipulated harvest in 2009 of 4.000.000 Kg & 7 to 8.000.000 Kg for the 2010.**

Find information for price evolution from 2002 to 2009 for the olive oil from www.oliva.net ([POOLred](#)) on the following Links:

[2002](#) [2003](#) [2004](#) [2005](#) [2006](#)
[2007](#) [2008](#) [2009](#)

Prices for the **general extra virgin olive oil** are on the diagrams, **prices for arbequina olive oil are higher than other varieties and its harvest is earlier** (October - November)
